SOFTWARE DEVELOPER / PISA, ITALY

Danilo Cappelletti

6+ years / Enterprise web & research tools

I build React and Vue applications, from enterprise workflows to tools for papyrus reconstruction.

SELECTED WORK

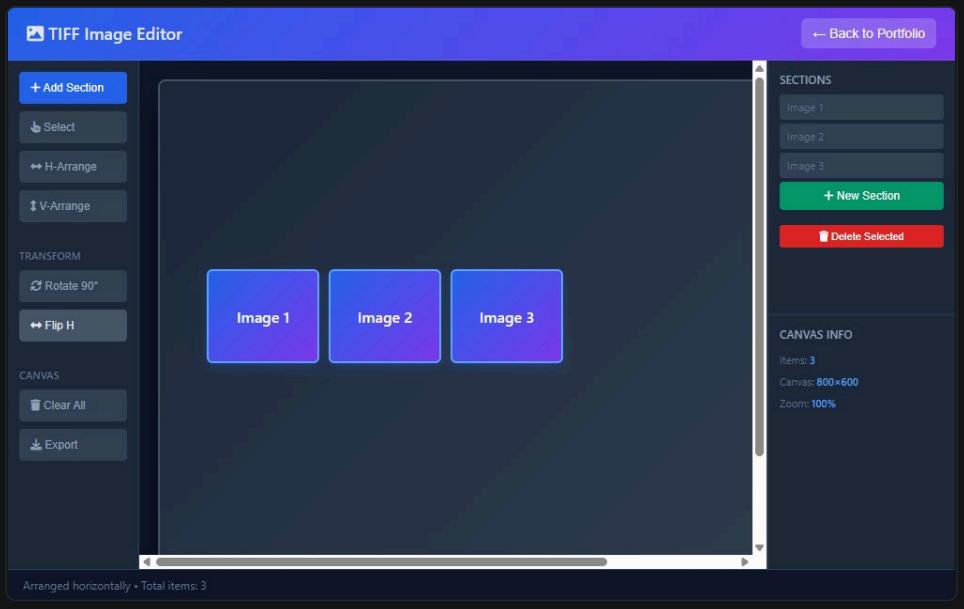

Real problems. Practical solutions.

01 / Research tooling / Sole developer

TIFF Image Editor

A specialist tool for arranging very large scans and reconstructing damaged papyri.

EU SEAL OF EXCELLENCE

Browser demo of the interface using placeholder images, not the production Python application.

01 **The problem**

The research team needed software that could handle very large image files and automatically arrange them for papyrus reconstruction.

02 **My role**

I was the only developer. I built the editor in Python, with tools for arranging and stitching images and measuring them precisely.

03 **Technical trade-off**

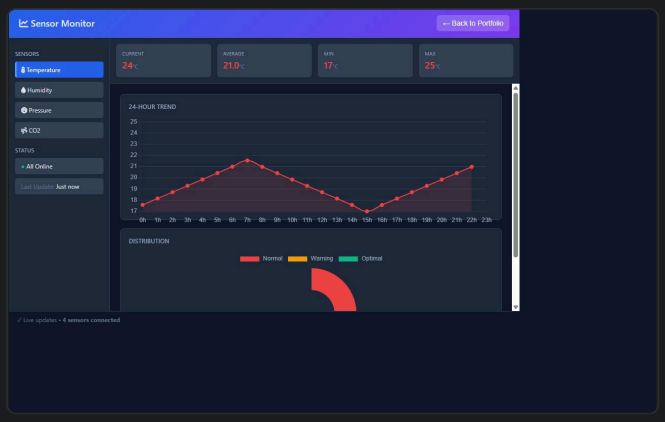

Navigating very large source files is slow. The design uses reduced-resolution previews for navigation and keeps the original data for export, so the interface stays responsive without losing detail in the output.

04 **The result**

The project received the EU Seal of Excellence in recognition of its quality, but was not funded because no funds were available.

Python Pillow Tkinter PyInstaller

Browser demo / simulated sensor data

02 / Data interfaces

Sensor Monitor

Vue 3 + TypeScript dashboard for monitoring IoT sensors, with live charts, historical analytics and responsive data tables.

Vue 3 TypeScript Chart.js Tailwind

Explore the demo →

03 / Personal full-stack project

GymBuddy

A personal project built to try out Next.js and Prisma: a booking platform with a credit system, instructor management and detailed reporting for classes and activities.

- Activity & class bookings
- Credits & payment workflows
- Instructor management & reporting

Next.js TypeScript Prisma PostgreSQL Stripe Tailwind

A BIT ABOUT ME

About Me

Software Developer based in Pisa, Italy

I'm a software developer based in Pisa with over six years of experience. I've built React and Node.js applications at Apparound, Vue.js applications at Stetel, and specialist tools in Python.

I've worked with product and design teams on enterprise software, and I was the sole developer of the TIFF editor. I like turning a specific, difficult workflow into software people can actually use.

WHAT I WORK ON

Skills in Practice

01 Frontend systems

Reusable components, responsive layouts and REST API integration for enterprise web applications.

React Vue JavaScript HTML / CSS / SCSS Docker

Apparound & Stetel →

02 Full-stack workflows

Booking interfaces connected to data models, credits and payments, in a personal full-stack project.

Next.js TypeScript Node.js Prisma PostgreSQL Stripe

See GymBuddy →

03 Specialist tools

Arranging very large images and measuring them precisely for papyrus reconstruction; charts and data interfaces for IoT sensor monitoring.

Python Pillow Tkinter Vue 3 Chart.js

WHERE I'VE WORKED

Work Experience

Software Developer

Stetel Srl · Livorno, Italy

November 2025 – June 2026

Designed and built responsive web applications on a Vue.js architecture, writing clean, modular JavaScript that scales over time. Managed Docker-based development environments to keep local and production workflows aligned, and integrated REST APIs while collaborating in an agile team.

Vue.js | JavaScript | Docker | REST APIs | Agile

Software Developer

Apparound SpA · Pisa, Italy

September 2022 – September 2025

Developed and architected enterprise-grade full-stack applications with React.js on the front end and Node.js on the server. Designed and integrated REST APIs for efficient client–server communication, coordinated technical work across cross-functional teams, and delivered secure, optimised code to strict enterprise standards.

React.js | Node.js | JavaScript | REST APIs

Web Developer

Unikey Corporation · Pisa, Italy

September 2020 – September 2022

Managed, customised and maintained WordPress-based websites and ecosystems. Optimised performance and load times with hand-written HTML, CSS and Vanilla JavaScript, built responsive UIs with React.js, and partnered with product and design teams to turn requirements into accessible, high-performing web experiences.

WordPress | HTML/CSS | Vanilla JS | React.js | Performance

Web Developer

JC Management · Dubai, UAE · Remote

May 2021 – August 2022

Built interactive, reusable front-end components with React.js and core JavaScript. Implemented pixel-perfect designs with advanced HTML5/CSS3 and ensured smooth, responsive experiences across mobile, tablet and desktop — working fully remote for a Dubai-based client.

HTML5 | CSS3 | JavaScript | React.js | Remote

MY BACKGROUND

Education

Scientific High School Diploma

Liceo Scientifico · I.S.I.S. "Zuccarelli" · Manciano, Italy

FINAL GRADE **98 / 100** EQF 4

- Mathematics & Physics — calculus, algebra, geometry, scientific method
- Logic & Problem Solving — rigorous analytical reasoning and data modelling
- Humanities & Languages — Italian, English, philosophy, critical thinking

Languages

Spoken & Written

IT	Italian	NATIVE
GB	English	PROFESSIONAL
PL	Polish	CONVERSATIONAL
