

SOFTWARE DEVELOPER / PISA, ITALY

Danilo Cappelletti

6+ years / Enterprise web & research tools

I build React and Vue applications, from enterprise workflows to tools for
papyrus reconstruction.

SELECTED WORK

Different problems.

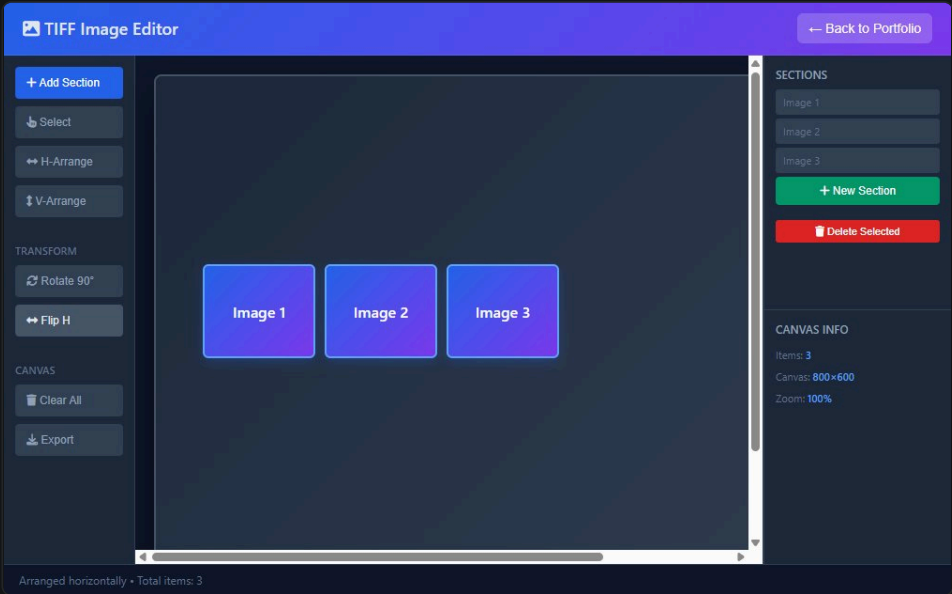

Considered solutions.

01 / Research tooling / Sole developer

TIFF Image Editor

A specialist tool for arranging very large scans and reconstructing damaged papyri.

 **PROJECT: SEAL OF EXCELLENCE** 

Browser interface demo with placeholder images, not the production Python application.

01 The problem

The research workflow needed suitable software to work with very large image files and automatically arrange them for papyrus reconstruction.

03 Technical trade-off

Large source files make interactive navigation costly. The documented design uses reduced-resolution image previews for navigation, while keeping original-resolution data for export: responsiveness without sacrificing output detail.

02 My contribution

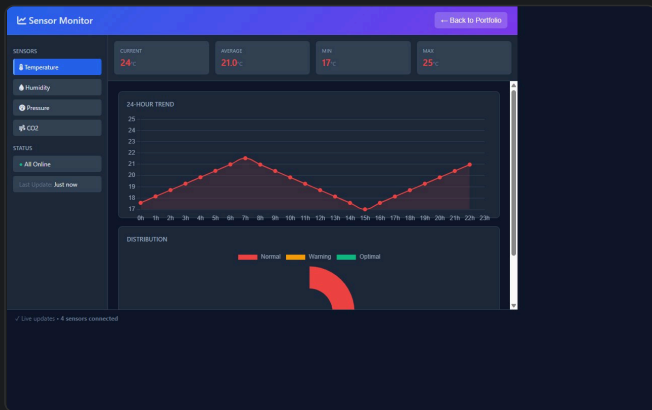

I was the sole developer, building the editor and its image arrangement, stitching and precision measurement tools in Python.

04 The result

The project received the EU Seal of Excellence, recognising its quality. It did not receive funding because funds were unavailable.

Python Pillow Tkinter PyInstaller

Browser demo / simulated sensor data

02 / Data interfaces

Sensor Monitor

Vue 3 + TypeScript dashboard for monitoring IoT sensor data with live charts, historical analytics, and responsive data tables.

Vue 3 TypeScript Chart.js Tailwind

03 / Personal full-stack project

GymBuddy

Personal project testing Next.js + Prisma workflows. Booking platform with credit systems, instructor management, and advanced reporting for activities and classes.

GET TO KNOW ME

Software Developer based in Pisa, Italy

I am a software developer based in Pisa with over six years of experience. My work spans React and Node.js applications at Apparound, Vue.js development at Stetel, and specialist Python tools.

I have worked with product and design teams on enterprise software and taken sole ownership of the TIFF editor. I enjoy turning a specific, difficult workflow into software people can use.

WHERE I'VE WORKED

Work Experience

Software Developer

Stetel Srl · Livorno, Italy

November 2025 – June 2026

Designed and built responsive web applications on a Vue.js architecture, writing clean, modular JavaScript for long-term scalability. Managed Docker-based development environments to keep local and production workflows aligned, and integrated REST APIs while collaborating in an agile team.

- Vue.js
- JavaScript
- Docker
- REST APIs
- Agile

Software Developer

Apparound SpA · Pisa, Italy

September 2022 – September 2025

Developed and architected enterprise-grade full-stack applications with React.js on the front end and Node.js on the server. Designed and integrated REST APIs for efficient client-server communication, coordinated technical work across cross-functional teams, and delivered secure, optimised code to strict enterprise standards.

- React.js
- Node.js
- JavaScript
- REST APIs

Web Developer

Unikey Corporation · Pisa, Italy

September 2020 – September 2022

Managed, customised and maintained WordPress-based websites and ecosystems. Optimised performance and load times with hand-written HTML, CSS and Vanilla JavaScript, built responsive UIs with React.js, and partnered with product and design teams to turn requirements into accessible, high-performing web experiences.

- WordPress
- HTML/CSS
- Vanilla JS
- React.js
- Performance

Web Developer

JC Management · Dubai, UAE · Remote

May 2021 – August 2022

Built interactive, reusable front-end components with React.js and core JavaScript. Implemented pixel-perfect designs with advanced HTML5/CSS3 and ensured smooth, responsive experiences across mobile, tablet and desktop — working fully remote for a Dubai-based client.

- HTML5
- CSS3
- JavaScript
- React.js
- Remote

Education

Scientific High School Diploma

Liceo Scientifico · I.S.I.S. "Zuccarelli" · Manciano, Italy

FINAL GRADE **98 / 100** EQF 4

- ✓ Mathematics & Physics — calculus, algebra, geometry, scientific method
- 🧠 Logic & Problem Solving — rigorous analytical reasoning and data modelling
- 📖 Humanities & Languages — Italian, English, philosophy, critical thinking
